这座面积1000平方米的私人住宅处在一块7000平方米的土地上。住宅的设计目标是创造一种盘旋在水上航行的感觉，灵感来自于业主对游艇的热爱。

住宅采用生物气候设计，与水接触给人凉爽感觉，并利用了太阳能与地热能，这些特点贯穿设计始终，设计虽极具动感与现代感，但仍不失为一个生态友好型设计。

This private house of a total 1000m² is located on a plot of land of 7000m². The house was designed in order to give the sense of hovering over the water and sailing, inspired by the owners love for yachts.

The bioclimatic design of the residence, the cooling feeling of the house through

the contact of water and the use of sun and the geothermic energy are consistent in developing a highly dynamic and modern but also eco friendly design.
